AAA COIN

INITIAL COIN OFFERING ICO

WHITE PAPER

In crypto we trust

2017 © The AAAcoin developers
Introduction

Most altcoins of today are missing a purpose. Disruption and greed seem to be the leading motifs. AAA COIN is purposefully designed to be different. Whilst satisfying the human desire for greed, it also serves a purpose of making men better. AAA COIN is a speculative blockchain-based cryptocurrency altcoin with the short-term goal of making men rich and long-term goal of making them better.

Making men rich is accomplished through easier than Bitcoin mining and 100% annual interest (~0.3% daily) on existing AAA COIN holdings, effectively doubling your money every year. In addition to the 100% annual interest (~0.3% daily) through Proof of Stake (PoS), the market price increase of the AAA COIN is designed into its creation through limited supply of coins that could be mined through Proof of Work (PoW).

Making men better is accomplished through investments of net profits into strategic global initiatives to prevent disease and extend human life. We have created decease-resistant plants and animals already. Why not humans?

Basic facts about AAA COIN:

- Name: AAA COIN
- Symbol: AAA
- Algorithm: Scrypt
- Type: PoW/PoS
- PoW block reward: 99 coins
- PoW and PoS reward time is just 1 hour
- Last PoW block 10,000
- PoS percentage: 100% per year
- Coinbase maturity: 1 block
- Transaction confirmations: 7 blocks (most exchanges require 6. IBM research into blockchain has suggested 7-12 confirmations. 12 is too long, 7 is secure and quick.)
- Difficulty PoW: 0.00024414
- Difficulty PoS: 0.00024414
- Block age: 10 days
- Total coin supply: 138,600,000 (100%)
- Coins available through Initial Coin Offering (ICO): 97,020,000 (70% of total coin supply)
- Limited number of coins available for mining: 41,580,000 (30% of total coin supply)
- Started exchange rate for ICO purposes: 1 AAA COIN = $1 USD fiat currency.
- ICO start date: to be announced
- ICO duration: 90 days
- ICO daily price increase 1% (i.e. if today 1 AAA COIN could be bought for $1, tomorrow, the price will increase to $1.01, and in 30 days to $1.33)
- First day ICO incentive 50% off (1 AAA COIN = $0.50 USD fiat currency)
- Good cause and good karma: 100% of net profits will be used towards elimination of terminal disease
- Accepted methods of payment: all major credit cards (Visa, MasterCard, Amex), PayPal, Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC). For larger orders, please fax to: +1 888 501 3231.
- ICO website: www.aaacoin.us
- Starter nodes are housed on secure and automatically scalable Amazon servers
- Windows and Linux hardware wallets are ready and can be used for transactions as well as PoS. Can be downloaded from AAA COIN website.
Problem

There are thousands of altcoins created by now (see Addendum). Most altcoins of today are missing a purpose. Disruption and greed seem to be the leading motifs. Altcoins are not widely accepted and most of them end up as experiments in coding and blockchain.

On the other hand, well established cryptocurrencies, such as Bitcoin, Ethereum, and Litecoin have become over the years excessively difficult to mine and mining of new coin is dominated by mining farms with millions of dollars in infrastructure investments that lie beyond common mortals’ reach. In addition to that, the Proof of Work (PoW) algorithms are designed in such a way to make it increasingly more difficult to mine each consecutive coin.
The biggest mining pools. Network hash rate by country¹:

China       81%
Iceland      5%
Japan        3%
Czech Republic 3%
Georgia      2%
India        2%

Hash rate distribution. An estimation of hash rate distribution amongst the largest mining pools:

¹ [https://www.buybitcoinworldwide.com/mining/pools/](https://www.buybitcoinworldwide.com/mining/pools/)
There is a crackdown on Initial Coin Offerings (ICO) throughout the world, led by the US, China, South Korea, Russia, Israel\(^2\). Stricter regulation on global movement of funds along with the intensification of Anti-Money Laundering and Know Your Client (AML / KYC) requirements make it increasingly more difficult to move funds around freely (especially for China, Russia, North Korea.) This could be one of the last profitable ICOs that you may partake in.

Solution

AAA COIN is purposefully designed to be different. Whilst satisfying the human desire for greed, it also serves a purpose of making men better. AAA COIN is a speculative blockchain-based cryptocurrency altcoin with the short-term goal of making men rich and long-term goal of making them better.

Making men rich is accomplished through easier than Bitcoin mining and 100% annual interest (~0.3% daily) on existing AAA COIN holdings, effectively doubling your money every year. In addition to the 100% annual interest (~0.3% daily) through Proof of Stake (PoS), the market price increase of the AAA COIN is designed into its creation through limited supply of coins that could be mined through Proof of Work (PoW).

Making men better is accomplished through investments of net profits into strategic global initiatives to prevent disease and extend human life. We have created decease-resistant plants and animals already. Why not humans?

Below is the list of problems and their respective solutions:

1. Problem: There are thousands of altcoins (see Addendum). Why choose AAA COIN?
   a. Solution: AAA COIN is the only altcoin cryptocurrency that allows for:
      i. PoW ease of mining (all you need is CPU, no GPU required)
      ii. PoS minting (just by holding your coins in a wallet) after all coin supply has been mined at an annual rate of 100% on staked coins (~0.3% a day)
iii. Good cause and good karma – 100% of net profits will be directed towards eliminating terminal disease

2. Problem: Increasingly difficulty of cryptocurrencies mining dominated by large mining pools.
   b. Solution: AAA COIN is using a Scrypt algorithm that allows for both PoW and PoS. PoW is not increasingly difficult and does not require GPU. Normal PC with only CPU can handle the mining task sufficiently. No massive mining pools required. Upon mining of the limited coin supply, users will be able to mint coins through PoS by just holding coins in their open wallets and earn 100% annual interest rate (~0.3 daily) on their staked coins.

3. Problem: Crackdown on ICOs by the US, China, South Korea, China, and Israel.
   c. Solution: Timing is right to partake in AAA COIN ICO – it could be the last one in this decade to be not bound by regulation and taxation.

4. Problem: Global intensification of AML / KYC and free movement of funds restrictions.
   d. Solution: AAA COIN is private and secure. No personal information is collected or stored anywhere. The owners and users of AAA COIN are not known and the users are free to move coins from wallet to wallet freely and anonymously. Only wallet number is shown in transactions. No names, IP addresses or other personal information is attached to a transaction.
Coin parameters

- **Name:** AAA COIN
- **Symbol:** AAA
- **Algorithm:** Scrypt
- **Type:** PoW/PoS
- **PoW block reward:** 99 coins
- **PoW and PoS reward time:** just 1 hour
- **Last PoW block:** 10,000
- **PoS percentage:** 100% per year
- **Coinbase maturity:** 1 block
- **Transaction confirmations:** 7 blocks (most exchanges require 6. IBM research into blockchain has suggested 7-12 confirmations. 12 is too long, 7 is secure and quick.)
- **Difficulty PoW:** 0.00024414
- **Difficulty PoS:** 0.00024414
- **Block age:** 10 days
- **Total coin supply:** 138,600,000 (100%)
- **Coins available through Initial Coin Offering (ICO):** 97,020,000 (70% of total coin supply)
- **Limited number of coins available for mining:** 41,580,000 (30% of total coin supply)
- **Started exchange rate for ICO purposes:** 1 AAA COIN = $1 USD fiat currency.
- **ICO start date:** to be announced
- **ICO duration:** 90 days
- **ICO daily price increase 1%** (i.e. if today 1 AAA COIN could be bought for $1, tomorrow, the price will increase to $1.01, and in 30 days to $1.33)
- **First day ICO incentive 50% off** (1 AAA COIN = $0.50 USD fiat currency)
- **Good cause and good karma:** 100% of net profits will be used towards elimination of terminal disease
- **Accepted methods of payment:** all major credit cards (Visa, MasterCard, Amex), PayPal, Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC). For larger orders, please fax to: +1 888 501 3231.
- **ICO website:** www.aaacoin.us
- **Starter nodes are housed on secure and automatically scalable Amazon servers**
- **Windows and Linux hardware wallets are ready and can be used for transactions as well as PoS. Can be downloaded from AAA COIN website.**
Conclusion

Due to the crackdown on ICOs and AML / KYC requirements making it increasingly more difficult to move funds around freely, you may have one last chance to partake in a profitable ICO. a. AAA COIN is private and secure. No personal information is collected or stored anywhere. The owners and users of AAA COIN are not known and the users are free to move coins form wallet to wallet freely and anonymously. Only wallet number is shown in transactions. No names, IP addresses or other personal information is attached to a transaction.

Unlike other altcoin cryptocurrencies based on blockchain revolution, AAA COIN is the only one that allows for non-GPU, CPU-based PoW mining and to earn a hefty income through PoS minting at a rate of 100% per year by just holding your coins in an open wallet. No other coin offers that.

In addition to the above, AAA COIN will follow good karma, investing net profits towards eradication of terminal diseases.

Contact information:

- Website: www.aaacoin.us
- Fax: +1 888 501 3231 (fax is used instead of email to protect the coin and developers’ computers from infiltration, viruses, and malware)

How to partake in ICO?

- Buy AAA COIN at www.aaacoin.us
- For large orders and serious inquiries, please fax to +1 888 501 3231 (fax is used instead of email to protect the coin and developers’ computers from infiltration, viruses, and malware)
Future of AAA COIN:

- Next step will be to make AAA COIN available to freely trade on most Bitcoin exchanges. We have everything ready to meet their requirements.
- The expected time for a confirmation is 64 seconds while Bitcoin's expected confirmation time is 10 minutes. BlackCoin’s Proof of Stake system secures the protocol through an efficient, decentralized process called “minting,” while Bitcoin uses a mining process that has been well documented as expensive and energy-intensive.
Addendum - list of altcoins

SHA-256 Alternate Cryptocurrencies

Altcoins using SHA-256, the same hashing algorithm as Bitcoin.

- NMC - Namecoin
- PPC - Peercoin
- DVC - Devcoin
- TRC - Terracoin
- BTE - Bytecoin
- IXC - Ixcoin
- IOC - I0coin
- FRC - Freicoin
- XJO - Joulecoin
- ZET - Zetacoin
- ASC - AsicCoin
- DEM - Deutsche eMark
- UNO - Unobtanium
- PT - Platinum Coin
- BLC - Blakecoin
- RKC - Reikicoin
- TIT - Titcoin

Scrypt Alternate Cryptocurrencies

Altcoins using Scrypt algorithm

- LTC - Litecoin
- NVC - Novacoin
- FTC - FeatherCoin
- WDC - WorldCoin
- BTM - Bitmark
- LAT - Latium
- MID - MidasCoin
- ELC - Elacoin
- DGC - DigitalCoin
- CGB - Cryptogenic Bullion
- MEC - Megacoin
- GLD - GoldCoin
- TAG - Tagcoin
- MMC - Memorycoin 2.0
- BTCs/BTC2 - Bitcoin Scrypt
- IFC - Infinitecoin
- KRN - Ekrona
- ANC - Anoncoin
- PND/PAND/PANDA - PandaCoins
Alternate cryptocurrencies can be mined using the same hardware as for mining Bitcoins (mostly SHA-256 altcoins). While bitcoin mining is going to use FPGA and ASIC devices, Scrypt based altcoins can be mined using GPU cards.

Hybrid and CPU alternate cryptocurrencies

Altcoins using other, innovative hashing algorithms such as X11, X13, X15, NIST5, 100% POS:

- ETH - Ethereum Cloud Mining
- XPM - Primecoin
- QRK - Quark
- SRC - Securecoin
- Nxt - Next
- QORA
- CLOAKcoin
- NHZ - NeXT Horizon
- YAC - Yacoin
- SKN - Skeincoin
- PTS - Protoshares
- DRK - DarkCoin
- MYR - MyriadCoin
- SWIFT - BitSwift
- Curecoin
- OFF - Offerings to Cthulhu
- MED - MediterraneanCoin
- MCZ - Mangocoinz - the first altcoin for smartphones
